SUBJECT INDEX

- Acetylation sequences in partially *N*-deacetylated chitins (chitosans), ¹³C-n.m.r. studies of the, 19
- Aldoses in water at high temperature: mechanism of formation of 2-furaldehyde from D-xylose, kinetic study of the reactions of ketoses and, 71
- D-Altiro, crystal and molecular structure of, 1
- Amylose, properties of hot-water-extractable, 251
- Biological response-conformation relationship in (1→3)-β-D-glucans, 181
- Bromide-oxidised potato starch, a ¹H- and ¹³C-n.m.r. study of, 221
- Calcium ion-release activity of D- and L-myoinositol 2,4,5-trisphosphate and D- and L-chiroinositol trisphosphate, synthesis and, 107
- Calorimetric and spectroscopic studies of the interaction of cyclomaltohexaose (α-cyclodextrin) with alkanols at 25°, 87
- (R)-(-)-Carvone, stereoselective reduction with sodium dithionite in the presence of cyclomaltoheptaose (β-cyclodextrin) and its heptakis (2,6-di-O-methyl) derivative, 345
- Chitosans (partially *N*-deacetylated chitins), ¹³C-n.m.r. studies of the acetylation sequences in, 19
- ¹³C-N.m.r. studies of the acetylation sequences in partially *N*-deacetylated chitins (chitosans), 19
- Conformational analysis of l-kestose by molecular mechanics and by n.m.r. spectroscopy, 29
- Conformation-biological response relationship in (1→3)-β-D-glucans, 181
- Crystal structure of D-altiro, 1
- Crystal structure of cyclomaltohexaose produced from inulin by cyclomalto-oligosaccharide fructanotransferase, 7
- Cyclomaltohexaose produced from inulin by cyclomalto-oligosaccharide fructanotransferase, crystal structure of, 7
- Cyclomaltoheptaose (β-cyclodextrin) and its heptakis(2,6-di-O-methyl) derivative, stereoselective reduction of (R)-(-)-carvone with sodium dithionite in the presence of, 245
- Cyclomaltohexaose (α-cyclodextrin), calorimetric and spectroscopic studies of the interaction with alkanols at 25°, 87
- Degradation of a glycosylated aldose, a potential method for sequencing branched oligosaccharides based on stepwise, 99
- Dermatan sulfate, n.m.r. spectra of, 227
- Dermatan sulfate, separation from heparin of, 227
- 3,6-Dioxaoctanal, 8-hydroxy-, glycosides, synthesis of, 263
- (1,2-Ethandiyl)-β-D-mannopyranose in a neighboring-group participation reaction of 2-O-(2-hydroxyethyl)-D-mannose, formation of 1,2-O-, 237
- Formation of 1,2-O-(1,2-ethandiyl)-β-D-mannopyranose in a neighboring-group participation reaction of 2-O-(2-hydroxyethyl)-D-mannose, 237
- Fructan chemical structure, use of an exohydrolase in studies of, 137
- Fructans from plants, new structural features of, revealed by methylation analysis and ¹³C-n.m.r. spectroscopy, 127
- α-D-Galactosidase from taro, conversion of red blood cells group B into group O by, 191
- Glomerella cingulata* Spaulding & von Schrenck, structural investigations of glucans from cultures of the fungus, 153
- Glucans from cultures of *Glomerella cingulata* Spaulding & von Schrenck, structural investigations of, 153
- (1→3)-β-D-Glucans, relationship between conformation and biological response in, 181
- D-Glucofuranurono-6,3-lactone, synthesis of four diastereomeric octofuranoses from, via Grignard reactions, 59
- α-Glucosidase (of rice), synthesis of *p*-nitrophenyl α-glucobiosides by use of native and immobilized, 255
- Glucosyltransferases, *Streptococcus mutans* 6715, maltodextrin acceptor reactions of, 201
- Glycosylated aldose, a potential method for sequencing branched 8-oligosaccharides based on stepwise degradation of a, 99
- Glycosyloxy-3,6-dioxaoctanal, synthesis of, 263
- Grignard reactions, synthesis of four diastereomeric octofuranoses from D-glucofuranurono-6,3-lactone via, 59
- Heparin, separation from dermatan sulfate of, 227
- Hot-water-extractable amylose, properties of, 251
- 8-Hydroxy-3,6-dioxaoctanal glycosides, synthesis of, 263

- myo*-Inositol 2,4,5-trisphosphates (D- and L-) and *chiro*-inositol 1,3,4-trisphosphates (D- and L-), synthesis and Ca^{2+} -release activity, 107
- Interaction of cyclomaltohexaose (α -cyclodextrin) with alkanols at 25°, calorimetric and spectroscopic studies of the, 87
- Kestose and neokestose, proton and carbon chemical-shift assignments from two-dimensional n.m.r. measurements, for, 43
- Ketoses and aldoses in water at high temperature: mechanism of formation of 2-furaldehyde from D-xylose, kinetic study of the reactions of, 71
- Kinetic parameters for maltotriose and higher malto-oligosaccharides in the reactions catalyzed by α -D-glucan phosphorylase from potato, 213
- Kinetic study of the reactions of ketoses and aldoses in water at high temperature: mechanism of formation of 2-furaldehyde from D-xylose, 71
- Klebsiella pneumoniae* OK2 lipopolysaccharide, structure of O-specific polysaccharide chain of, 117
- Lipopolysaccharide of *Klebsiella pneumoniae* OK2, structure of O-specific polysaccharide chain of, 117
- Maltodextrin acceptor reaction of *Streptococcus mutans* 6715 glucosyltransferases, 201
- Maltotriose and higher malto-oligosaccharides, kinetic parameters for the reactions catalyzed by α -D-glucan, phosphorylase from potato, 213
- Molecular mechanics, conformational analysis of 1-kestose by, and by n.m.r. spectroscopy, 29
- Molecular structure of D-altitrol, 1
- Neighboring-group participation reaction of 2-O-(2-hydroxyethyl)-D-mannose, formation of 1,2-O-(1,2-ethandiyl)- β -D-mannopyranose in a, 237
- Neokestose and 6-kestose, proton and carbon chemical-shift assignments from two-dimensional n.m.r. measurements, for, 43
- p-Nitrophenyl α -glucobiosides, enzymic synthesis by use of native and immobilized rice α -glucosidase, 255
- N.m.r. measurements, two-dimensional, proton and carbon chemical-shift assignments for 6-kestose and neokestose from, 43
- N.m.r. spectroscopy, conformational analysis of 1-kestose by molecular mechanics and by, 29
- N.m.r. study of bromine-oxidised potato starch, a ^1H - and ^{13}C -, 221
- Octofuranoses, synthesis of four diastereomeric, from D-glucofuranurono-6,3-lactone via Grignard reactions, 59
- Phosphorylase, α -D-glucan, from potato, kinetic parameters for reactions of maltotriose and higher malto-oligosaccharides catalyzed by, 213
- Plant-fructan structure, new features revealed by methylation analysis and ^{13}C -n.m.r. spectroscopy, 127
- Plant-fructan structure, use of an exohydrolase in studies of, 137
- Polysaccharide from *Streptococcus pneumoniae* type 7B, structure of the capsular, 171
- Polysaccharide isolated from the green seaweed *Chaetomorpha anteninna*, structural studies of a, 163
- Properties of hot-water-extractable amylose, 251
- Red blood cells group B, conversion into group O by α -D-galactosidase from taro, 191
- Seaweed *Chaetomorpha anteninna*, structural studies of a polysaccharide isolated from the green, 163
- O-Specific polysaccharide chain of lipopolysaccharide of *Klebsiella pneumoniae* OK2, structure of, 117
- Starch, a ^1H - and ^{13}C -n.m.r. study of bromine-oxidised potato, 221
- Stepwise degradation of a glycosylated aldose: a potential method for sequencing branched oligosaccharides, 99
- Stereoselective reduction of (R)-(-)-carvone with sodium dithionite in the presence of cyclomaltoheptaose (β -cyclodextrin) and its heptakis (2,6-di-O-methyl) derivative, 245
- Streptococcus pneumoniae* type 7B, structure of the capsular polysaccharide from, 171
- Structural investigations of glucans from cultures of *Glomerella cingulata* Spaulding & von Schrenck, 153
- Structural studies of a polysaccharide isolated from the green seaweed *Chaetomorpha anteninna*, 163
- Structure of the capsular polysaccharide from *Streptococcus pneumoniae* type 7B, 171
- Structure of cycloinulohexaose produced from inulin by cycloinulo-oligosaccharide fructanotransferase, the crystal, 7
- Synthesis of four diastereomeric octofuranoses from D-glucofuranurono-6,3-lactone via Grignard reactions, 59
- Taro (*Colocasia esculenta*), conversion of red blood cells group B into group O by α -D-galactosidase from, 191
- 1-Thiotrehaloses, hydrogen fluoride-mediated synthesis of, 51
- 1-Thiotrehaloses, synthesis by reaction of D-glucose with hydrogen sulfide of, 51
- Trehaloses, 1-thio-, synthesis of, 51
